
# DKV.4171

*Positive connection: cationic locking*

If you are using usual waterborne coatings, wood stains dissolve from the substrate and lead to a colour change. With our DKV.4171 we have the solution! The cationic nature of this resin helps to lock stains in the primer preventing migration to the surface. The waterborne DKV.4171 locks stains, dries fast and is eco-friendly. In addition, this resin offers a good adhesion to wood, old coats and mineral substrates.

## Unique properties

- Locks wood bleeds without problems
- Locking properties against all types of stain and dirt
- Good wet adhesion
- Suitable for interior and exterior applications

## Environment-friendly

- Contains neither APEO nor plasticiser
- Not EUH 208 labelled

## Typical applications

- Wood stain locking primers
- Locking primer against nicotine, soot and water stains
